Education: B.Tech in Computer Engineering, Pune University

Experience: 1 year

Professional Summary:

Junior AI Engineer with focus on Computer Vision and Deep Learning pipelines.

Technical Skills:

Python, TensorFlow, Keras, OpenCV, Deep Learning, Machine Learning, NumPy, Pandas, Git

Key Projects & Experience:

Built real-time road lane detection and traffic sign recognition using OpenCV and TensorFlow.

- Utilized agile methodologies and version control for collaborative development.
- Delivered robust software solutions adhering to clean code standards and system design principles.
